GENERAL INFORMATION

These decorative screen doors are offered in two attractive finishes and fit on the face of the appliance over the glass doorframe. If you encounter any problems, need clarification of these instructions or are not qualified to properly install this kit, contact your local distributor or dealer.

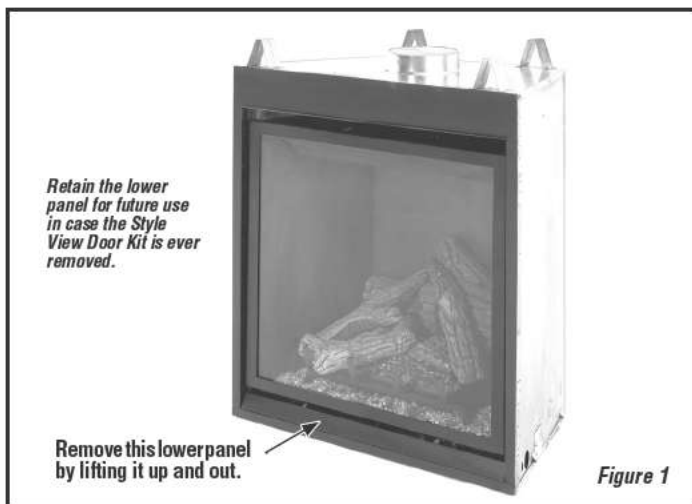

WARNINGS

Hot! Do not touch! The decorative screen doors and the glass behind the screen doors will become hot during operation and will retain heat for a while after shutting off the appliance. Severe burns may result. Carefully supervise children in the same room as appliance.

- These decorative screen doors are NOT heat guards and are not intended to prevent burns.
- Operate the doors by only using the door handles. Avoid touching the doorframe, screens, or the glass enclosure, if the door is opened.
- Use care when opening doors. Avoid exerting any downward pressure on the doors when they are in an open position. Excessive force can cause the doors to come loose or be damaged.
- **INSTALL ONLY WHEN THE FIREPLACE IS OFF AND COLD!**

INSTALLATION INSTRUCTIONS:

1. Remove and retain the Lower Panel per instructions in *Figure 1*.

*** NOTE:** The fireplace is equipped with a unit-mounted ON/OFF switch. In most installations this switch is not used. If you desire to use the switch and want to install these Style View Doors, you may desire to relocate the switch into the bracket provided on the door frame. This is **OPTIONAL**. If you desire to relocate the switch complete the optional procedures indicated by the asterisks below. Steps 2, 4 and 5 refer to ELDV Models only. For MPLDV Models, purchase a Rocker Switch kit model FRS (80L41).

- *2. Remove the Piezo / Switch Bracket from fireplace control compartment by pulling it forward as shown in *Figure 2* (also see *Figure 6*).

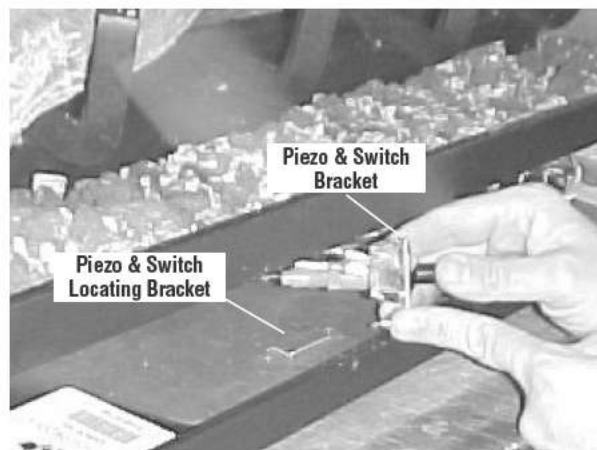

Figure 2

- *3. Disconnect the black and white wires from the ON/OFF switch.
- *4. Remove the ON/OFF switch from the bracket by squeezing the flex catches on sides of switch until it releases from bracket.
- *5. Reinstall the bracket with the piezo (reverse *Step 2*).
6. Remove Doorframe from packaging. Install as follows:
 - *a. Position switch wires in front, inside of control compartment (so they can easily be reached after doorframe is in position).
 - b. Position the bottom of the doorframe so that the bracket on the inside of the doorframe locks behind the cabinet bottom flange as shown in *Figure 4*.
 - *c. Feed the switch wires through the switch mounting bracket on doorframe as shown in *Figure 3*.

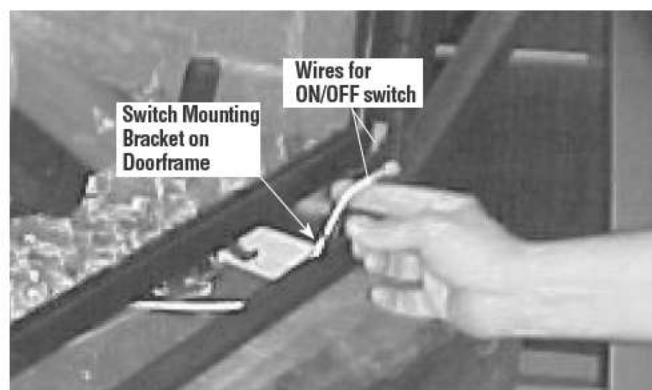

Figure 3

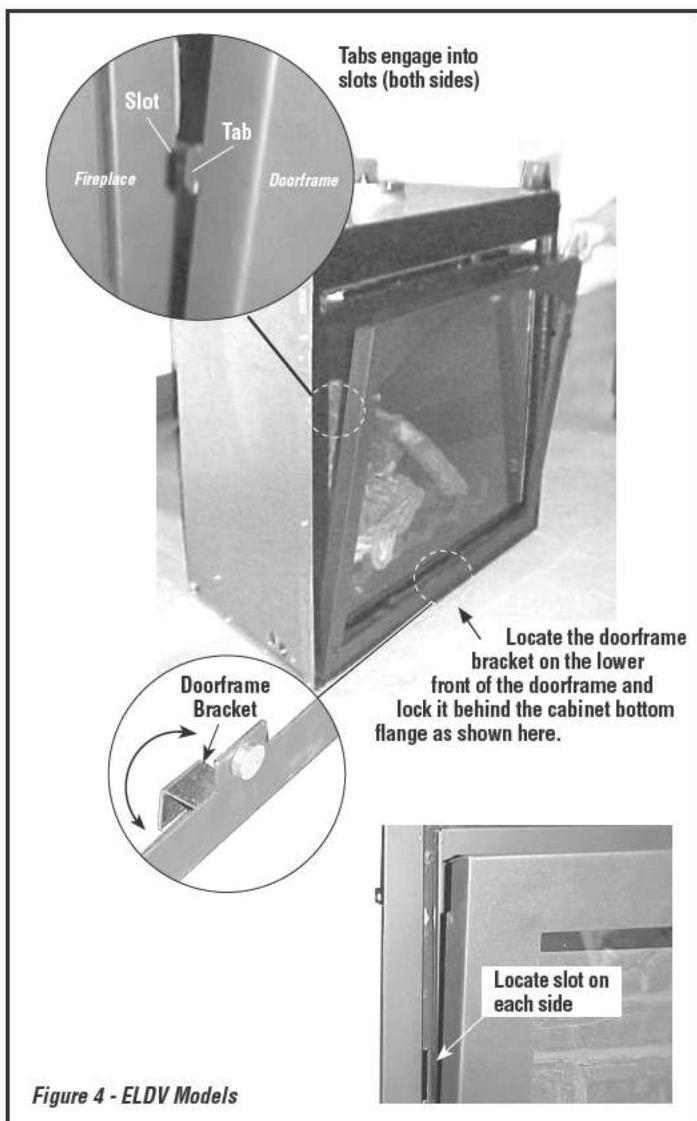

Figure 4 - ELDV Models

- d. ELDV Models - Locate slots on each side of fireplace (see **Figure 4**).
- e. ELDV Models - Hold the top of the door frame slightly away from the fireplace front while aligning the tabs on door frame with the corresponding slots on fireplace. While the tabs engage, slide the top of the door frame so that it goes over the top of glass door assembly (see **Figures 4 & 7**).
- f. MPLDV Models - Locate the top of the door frame and identify the return flange. Position the door frame in front of the glass door assembly and hook the door frame over it at the top. Let the door frame fall into place. Position the door frame right to left and use the clips to engage the door frame and glass door assembly, to lock it (lower left and right corners of the opening). The clip will slide between the metal frame of the glass door assembly and the glass. Refer to **Figures 5 and 6**.
- *g. Connect the switch wires to the ON/OFF switch. Press the ON/OFF switch down into the switch mounting bracket on door frame until it locks in place (see **Figure 8**).

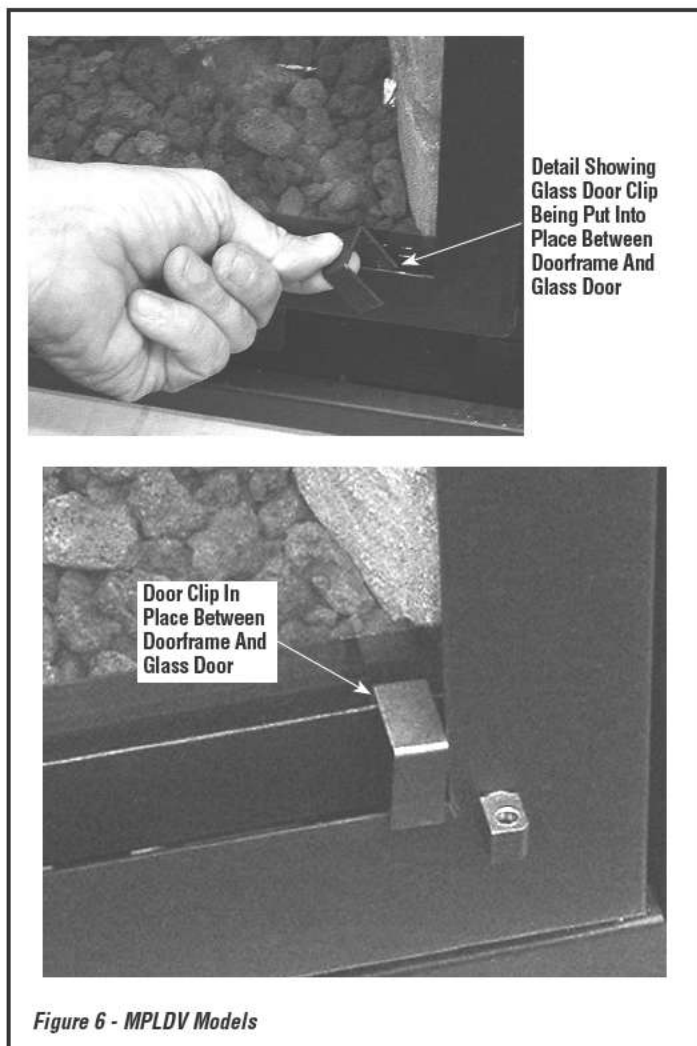

Figure 6 - MPLDV Models

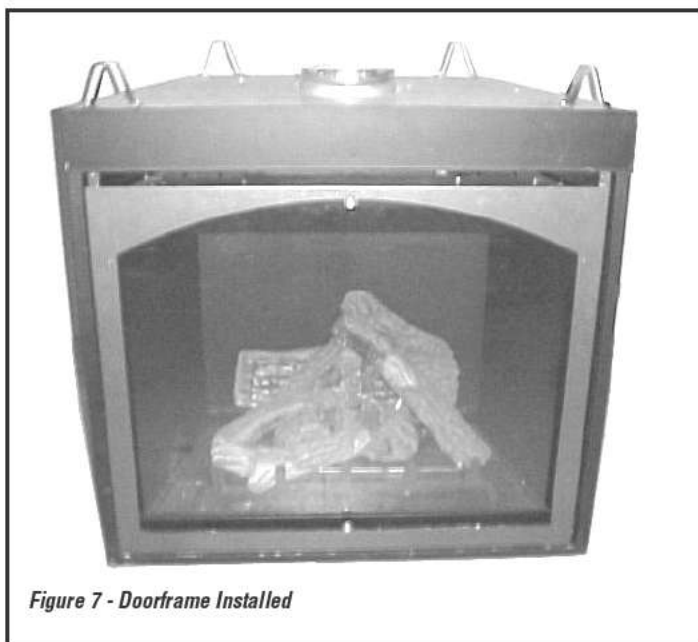

Figure 7 - Doorframe Installed

7. Remove the left and right side Style View doors from packaging. Install them by aligning hinge pins on the doors with the hinge holes on the doorframe and slide down (see **Figure 9**). Ensure the hinge pins are fully seated onto the shoulders of the hinge holes.

Note: For MPLDV 30" models, remove single piece facade panel and mount the four pins into the hinge shoulders.

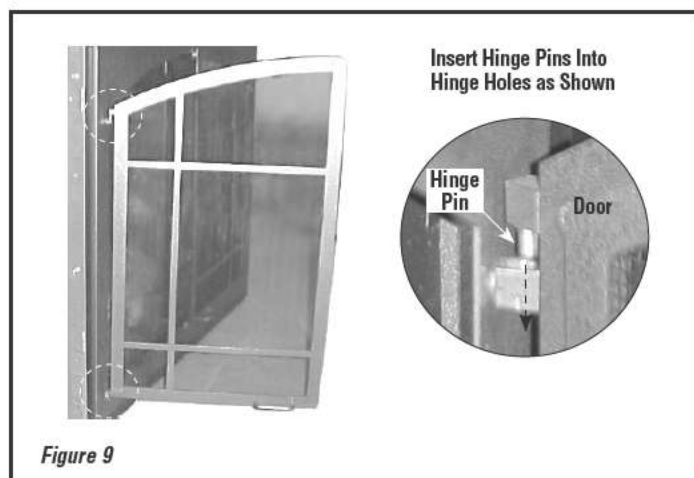

Figure 9

8. Close Doors (see **Figure 10**).
