FEATURING FULL FLAME™ TECHNOLOGY

The coveted focal point of the Envy is its exclusive FullFlame™ technology which delivers a beautiful fire presentation in both high and low settings. The unique design of the patent-pending FullFlame independent burner allows for different air-fuel ratios to deliver lean hot flames to generate glow, while a richer mixture delivered through a separate channel provides tall yellow flames. Turning down the heat no longer means you'll be reduced to just a small ember glow. Even on its lowest setting the Envy continues to deliver the ambiance of realistic embers, glowing logs and dancing yellow flames. The Envy gives you more reasons to enjoy the ambiance of a fire any time of the season.

IMPORTANT NOTES:

As with any heating appliance, fireplace or stove, this appliance is extremely hot during operation. Read and understand all operating instructions before using this appliance. For further information, consult your dealer.

Local conditions, such as elevation, wind, vent configuration and choice of fuel will affect overall appearance of the fire and heating performance. Performance can also vary with home design and insulation, climate, condition and type of fuel used, appliance location, burn rate, accessories chosen, chimney installation and how the appliance is operated.

Diagrams, illustrations and photographs are not to scale—consult installation instructions. Product designs, materials, dimensions, specifications, colors and prices are subject to change or discontinuance without notice.
