Listing Information

Report No. F12-020

These appliances comply with National Safety Standards and are listed by PFS Corporation to ANSI Z21.91 Ventless Firebox Enclosures for Gas-Fired Unvented Decorative Room Heaters and is approved for use with appliances listed to ANSI Z21.11.2 decorative type unvented room heaters.

Clearances

Minimum Wall and Ceiling Clearances (see figure below)

- Clearances from the side of the fireplace cabinet to any combustible material and wall should follow diagram shown here.
Example: The face of a mantel, bookshelf, etc. is made of combustible material and protrudes 3-1/2" from the wall. This combustible material must be 4" from the side of the fireplace cabinet.
- Clearances from the top of the firebox opening to the ceiling should not be less than 42".
- When the firebox is installed directly on carpeting, vinyl tile or other combustible material, other than wood flooring, the firebox should be installed on a metal or wood panel extending the full width and depth of the enclosure.
- Clearances from the bottom of firebox to the floor is 0".
